This explains a quite a few things- for you but may be not all. It always helps you to have a rectified ascendant for accurate analysis and predictions.

B)Rectified Ascendant Based on Nakshatra

The birth time rectification has a rational and scientific basis, it has been observed that based on various phases of moon children are born, more or less depending on which phase moon is.

Also in what time phase more of female births would happen or male birth would happen is correlated with the moon phases.

Like 40 minutes after the moon has passed 40 minutes from the lowest meridian the number of births reduces.

IN second of sign Aquarius there is a decrease in the first few degrees of Pisces there is an increase in number of birth.

Similarly the ancient rishis or seers found that Birth of any Individual can happen only on certain specific time. Based which we find out when are the possible times for one to be born.

- **So as a first step we verify, if the time suggested is a time when someone could be born, if not then what is the next time when someone could be born based on present birth time.**
- **Then as a second step we check if the horoscope based on the adjusted time the real life events of the person , that if they really corroborate with time found.**

Birth time is generally before the recorded time as there is a delay in recording and letting the parents know.

Calculations:

- **First Correction:** The time in vighatis from the sun rise **06:23AM** 1 vighati = 24 seconds
- **Friday**

13:45 Noon(current time of birth of yours)

**Difference(sun rise to time of birth) =
13:45 – 6:23 = 7 hours 22 minutes**

Friday

Difference in vighatis = $(7 \times 3100 + 21 \times 60) / 24$

= $(23,400 + 1320) / 24 = 28530 / 24 = 1105$

Vighatis or $1105 / 60$ ghatis = **17.41**

= 18.41 (vighatis) $\times 4 / 9 = 73.64 / 9$ = the remainder is 1.64

Nakshatra= bharana(2nd start from ashwini)

Weekday = Friday

The above time is not correct as per uttar kalamrit classical text for being born on Friday(it has to be 18.14) is more accurate choice as it is at that time only someone could be born

So there the difference is $18.41 - 18.14 = .27$ ghatis

1 vighati = 24 seconds

2.5 vighati = 1 minute

60 vighati = 1 ghatis = 24 minutes

2.5 ghatis = 1 hour

60 ghata = 24 hours = 1 day

7 days = 1 week

1 ghata = $24/60$ hours = $24 \times 60 / 60 = 24$ minutes

0.27 ghatis = 6.48 minutes

= 6 minutes + $.48 \times 60$ seconds = 6 minutes + 28.8 seconds

So your birth time is 13:45 – 6 minutes and 29 seconds = 13:39 -29 seconds or 13:38 minutes and 31 seconds

This is very useful for horoscope and varga charts /divisional chart,naadi interpretation & getting right remedies for cure as d9 also changes.

C). CONCLUSION:

The given major events match with the rectified birth chart and with reference to matching these events; the rectified birth time could be the correct one.

The rectified ascendant and time =

13:39.31

And rectified ascendant degree = 18:21
Sagittarius lagna

All this would help you in naadi and other predictions.

BONUS for personal and professional Life(I may have shared this earlier as well but still to help)

Wearing 5-6 rattis pukhraj (in gold to be worn in index finger on Thursday) would be very good help in education.

If You don't want the ring and want to save money.

Draw this in a piece of paper on Thursday and keep it in purse it would have some effects, atleast 50%.You would be helps a lot by any of the two above remedies or the one given below.

10	5	12
