**A). CALCULATED Current ASCENDANT(an illustrative example only, dates and data have been modified for privacy):**

**9 November 1955**

**21:19**

**New York ,USA**

**26:49 degrees Pisces**

**B)Rectified Ascendant Based on Nakshatra**

The birth time rectification has a rational and scientific basis, it has been observed that based on various phases of moon children are born, more or less depending on which phase moon is.

Also in what time phase more of female births would happen or male birth would happen is correlated with the moon phases.

Like 40 minutes after the moon has passed 40 minutes from the lowest meridian the number of births reduces.

IN second of sign Aquarius there is a decrease in the first few degrees of Pisces there is an increase in number of birth.

Similarly the ancient rishis or seers found that Birth of any Individual can happen only on certain specific time. Based which we find out when are the possible times for one to be born.

- **So as a first step we verify, if the time suggested is a time when someone could be born, if not then what is the next time when someone could be born based on present birth time.**
- **Then as a second step we check if the horoscope based on the adjusted time the real life events of the person , that if they really corroborate with time found.**

**Birth time either 21:15, 21:19 or some time before or after that**

### **Calculations:**

- **First Correction:**The time in vighatis from the sun rise

**6:42 sunrise and sun set 19:52 at Ontario**

1 vighati = 24 seconds

**21:19(current time of birth of yours)**

**Difference(sun rise to time of birth) =  
21:19 – 6:42 = 14h 37 minutes**

**Difference in vighatis** =  $(14 \times 3600 + 37 \times 60) / 24$

=  $(50,400 + 2,220) / 24 = 52,620 / 24 = 2192.5$

Vighatis =  $2192.5 / 60$  ghatish = **36.541**

=  $2192.5(\text{vighatis}) \times 4 / 9 = 8770 / 9$  = the remainder is 2

Nakshatra = bharani( 2<sup>nd</sup> start from ashwini)

Weekday = Monday

***The above time is not correct as per uttar kalamrit classical text for being born on Monday***

- **Second correction:** Let us take 4 minutes ahead 21:15 time as a correction time

In terms of ghatish it is  $240 / 24 = 10$  vighatis =  $10 / 60 = 1 / 6$  Ghati = 0.1666

So over all total ghatish =  $36.541 - 0.1666 =$   
**36.37**

This is also not correct.

- **Third Correction:** So lets us try 21:17 minutes, a little lesser instead

So the total ghatish =  $36.541 - (120 / 24) / 60 =$   
 $36.541 - 0.0833 = 36.45$

This is slightly off the mark

- **Fourth Correction:** So let's try 21:16:30 seconds
- $36.45 - 0.02083 = 36.42$  (This is not correct)
- **Fifth correction:** Let us do one more iteration

**Let's try 21:16:20 seconds**

**This give 36.41306 – this is almost 100%accurate!!**

**Let us verify how accurate this rectified ascendant is for some life events below marked in bold .**

## **B). MAJOR PAST EVENTS:**

**Here are some points to help as I'm not sure what you need. Please keep information confidential and private.**

1 I have Never gotten married and have no children
